ExtremeLocation

The ubiquitous use of mobile technology empowers enterprises to take their business to a new level with deeper insights. With real-time location and analytics from Extreme Networks, enterprises such as; retail and hospitality can engage their customers with contextual-based personalized experience, while transportation and logistics, manufacturing and healthcare can monitor workflow and assets to improve their overall operation and efficiency.

Product Overview

ExtremeLocation is a resilient and scalable cloud-based location and analytics solution offered by Extreme Networks as a subscription service, to align with your new business imperatives.

ExtremeLocation provides enterprises powerful multi-tier location services that can scale to thousands of branch sites and 100,000 access points. ExtremeLocation offers a range of granular location accuracy to address various application scenarios with extensive real-time and historical location analytics, such as; new and repeat visitors, visitor engagement times, location of associates and specifics of site or zone performance.

When combined with Extreme's enterprise-grade wireless networking, ExtremeLocation is an easy to use cloud-based platform that helps you transform your business with a highly available pay-as-you grow solution. Backed by Extreme Network's industry-leading global support and services, ExtremeLocation simplifies the difficult task of supporting your business transformation goals.

Figure 1

Dial-In Location Accuracy for Optimum Results

ExtremeLocation provides a range of location accuracy to let you tune the location services to the level of detail required. From presence which detects a device, to a zone which locates a device in an area, to position, which provides exact location of the device, ExtremeLocation lets you dial-in the level of granularity that meets your business needs.

Powerful Analytics for Contextual Results

ExtremeLocation brings out the true value of location-based services by delivering powerful analytics and trends which can be viewed by administrator's or extracted by campaign and policy engines via the RESTful APIs. ExtremeLocation provides extensive real-time and historical location analytics which can be chosen for a duration, including site, zone and associate analytics. Administrators can view real-time dashboards and monitor trends of sites, zones and associates.

Site analytics provide trends for overall footfall (visits), bounced versus engaged, shopper engagement, loyalty customers and repeat and new visits.

Zone analytics allow you to collect additional insights within a site, into the department level, to help you understand the number of visits to a department, the number of engagements and unique visitors, identification of the top and bottom 5 departments, along with the customer engagement times within those departments. Zone analytics also provide powerful device and engagement heat maps which provide a quick visual of activity in the departments.

Improving the customer experience is not just knowing where the customers are, but also knowing where the store associates are to better serve those customers. Associate analytics can help you better connect your associates with customers, find the closest associate, understand how much time associates are spending in each department and identify the ratio of associates to visitors in every zone. With this information, you can better serve your shoppers and improve their overall experience within your store.
